

Arrow of Light Career Frame

Instructions

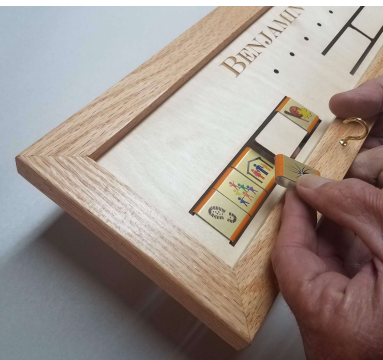

Locate all of your Belt Loops and Pins that are to be installed on the frame, and start by gently pushing up one side of the belt loop tab and sliding on a belt loop.

Continue adding belt loops to one side until you have 3 belt loops on the left side tab.

Next gently push up the other side of the belt loop tab and slip on the remaining 3 belt loops for the rank you're working on.

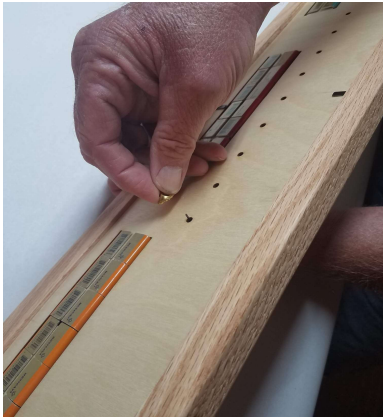

Continue this until you have the 6 required belt loops on each of the 3 locations across the plaque as shown below.

Next, put the post of the Adventure Pin through the hole, turn the plaque over and then put the pin back on the post to secure the pin to the face of the plaque.

Repeat this until all of the Pins are on the plaque as shown below.

Finally, screw the cup hooks into the pre-drilled holes on the face of the frame and place the Navajo Arrow in the cup hooks, then hang on the wall using the saw tooth hanger and a wall hanger of your choice.
